1 Introduction

This document describes the **Insect Leaf Biomass Defoliation** extension for the LANDIS-II model. For information about the model and its core concepts, see the *LANDIS-II Conceptual Model*

1.1 Description

This extension is essentially the same as the Insect Biomass Defoliation extension except that it is compatible with leaf-biomass succession extensions, for example, the Century Succession extension. All relevant details can be found in the documentation for the latest Insect Biomass Defoliation extension.
